

Data Discussion Protocols for Midyear Reflection

Equitable Success

This protocol is designed to help focus attention and monitor success of demographic groups. It uses the Series and Flexible Assessment Reports in “growth” view. Toggle through the demographic options on the right of the report.

Looking at the Trends

Open A Flexible Assessment Report
Focus on district or school-level data cohort.

Turn on the demographic information.

What do you see? What questions do you have?

Turn on class level data. Do you see the same trends? What is different?

Breaking Trends

Open a series assessment, from a recent, or current unit. Focus on district or school-level data. Turn on the demographic information.

What do you see? What questions do you have?

Turn on class level data. Do you see the same trends? What is different?

Student by Student

Which students are represented by the results you are seeing? What supports do they need in order to succeed at the levels of their peers. Look at the results from recent assessments. How will lessons be implemented to ensure greater success by the end of the unit?

Achievement gaps are closed lesson by lesson, unit by unit.
