# Fractional Reasoning Screeners Launch Guide

## Overview

The Fractional Reasoning Screeners (FRS) are designed to support teachers in understanding students' reasoning about fractions. These common formative assessments help teachers discover how students think about fractions in order to inform targeted instruction. Watch a video overview here.

4th and 5th grade classes will use two screeners per year:

- 4th Grade: Early and Intermediate
- 5th Grade: Intermediate and Advancing

**Duration of** 

Assessment

**Early & Intermediate Assessments:** 

**Advancing Assessment (Grade 5):** 

Be prepared to provide some additional

time for students who did not have the chance to complete their responses, and

for students who you ask to add more

Each assessment includes:

• Written assessment

Up to 45 minutes

Up to 60 minutes

detail to their responses.

- Teacher script
- Detailed scoring rubric
- Sample student responses for scoring calibration

# **Scoring the Assessment**

The amount of collaborative time needed for scoring and discussion will depend on class size and teachers' familiarity with the assessment. Ideally, teacher teams working with instructional coaches should plan for 1.5 to 2.5 hours to review student work, score responses, enter data into Forefront, and explore the instructional next steps.

Link to the collaborative scoring guide.

The first round of scoring may take longer, but the process becomes more efficient as teachers gain familiarity with the tasks.

### **Professional Learning**

The FRS Online Course is included with subscriptions. Learn more here.

### **Using Data for the First Time**
